

Raj Javiya

Senior Flutter Developer | Flutter & Native Android

Ahmedabad, Gujarat, India | javiyaraj4@gmail.com | +91 8238949574 | [linkedin.com/in/javiyaraj](https://www.linkedin.com/in/javiyaraj) | javiyaraj.vercel.app

PROFESSIONAL SUMMARY

Flutter Developer with 4 years of experience building and shipping production mobile applications for Android and iOS. Strong expertise in Flutter, Dart, Clean Architecture, MVVM and BLoC/Cubit state management, with hands-on native Android development using Kotlin, Java and Jetpack Compose. Experienced across the full development lifecycle — from Figma-to-Flutter UI development and REST/GraphQL API integration with Firebase and Supabase, through testing, CI/CD, and end-to-end App Store / Play Store release management — with a consistent focus on scalable architecture, code quality, and mentoring within the team.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android, Kotlin, Java, Jetpack Compose

Architecture: Clean Architecture, MVVM, Feature-First Architecture, Modular Architecture

State Management: BLoC, Cubit, GetX, Provider, Riverpod

Backend & APIs: REST APIs, GraphQL, Firebase, Supabase

Database: PostgreSQL, SQLite, Hive, Firestore

Testing: Unit Testing, Widget Testing, Integration Testing

DevOps & Release: Git, GitHub Actions, CI/CD, Bitrise, Codemagic, App Store & Play Store deployment and release management

UI & Performance: Figma-to-Flutter, Material Design, Cupertino Widgets, Flutter DevTools, Performance Optimization

PROFESSIONAL EXPERIENCE

Flutter Developer

Sep 2023 – Present

Esparkbiz · Ahmedabad

- Architected and shipped production Flutter applications using Clean Architecture and MVVM with a feature-first module structure, improving maintainability and feature delivery speed.
- Adopted BLoC/Cubit state management across the team, improving testability and reducing state-related bugs surfaced during code review.
- Translated Figma designs into responsive, pixel-accurate UIs with custom animations optimized for smooth performance on Android and iOS.
- Integrated REST and GraphQL APIs alongside Supabase and Firebase (Auth, Firestore, FCM) with a repository-layer abstraction for maintainability and offline resilience.
- Implemented native Android functionality using Kotlin, Java and Jetpack Compose where platform-specific capabilities were required.
- Owned end-to-end App Store and Play Store release management — versioning, staged rollouts and release notes — on top of GitHub Actions CI/CD pipelines for automated linting and widget testing.
- Led architecture and code-quality reviews, participated in client requirement discussions and task breakdowns, and mentored two junior developers.

Software Developer Intern

Jan 2023 – Sep 2023

Esparkbiz · Ahmedabad

- Developed and refactored features across production Flutter applications using Agile and Git workflows.
- Optimized UI rendering and asynchronous operations, and wrote widget and unit tests as part of the team's quality-first process.

SELECTED PROJECTS

Dyshez — Cross-Platform Food Delivery App | Flutter, Supabase, PostgreSQL

- Built a cross-platform mobile application using Flutter with Supabase backend services, including authentication and real-time order updates.
- Built a rewards and loyalty system with points, discount redemption and personalized offers to support repeat purchases.
- Built an admin interface for restaurant operators covering menu management, pricing updates and live order tracking.

Smackdab — Sales Productivity Tool | Flutter

- Built a Flutter-based sales productivity application used by sales teams to manage schedules and daily workflows.
- Built a custom calendar module and a library of reusable UI components to speed up feature development.
- Built a responsive, modular layout optimized for both mobile and tablet form factors.

Goals — CRM for Goal Tracking & Incentive Management | Kotlin, Jetpack Compose, MVVM, Firebase Cloud Messaging

- Built a native Android CRM application using Kotlin and Jetpack Compose with a standard MVVM architecture, supporting real-time goal tracking and incentive management workflows.
- Optimized network and asynchronous operations using Retrofit/OkHttp and Kotlin Coroutines to improve app responsiveness.
- Integrated Firebase Cloud Messaging and image-loading optimizations to improve performance.

EDUCATION

Bachelor of Engineering — Shantilal Shah Engineering College, Bhavnagar | CGPA: 8.89

2023
